

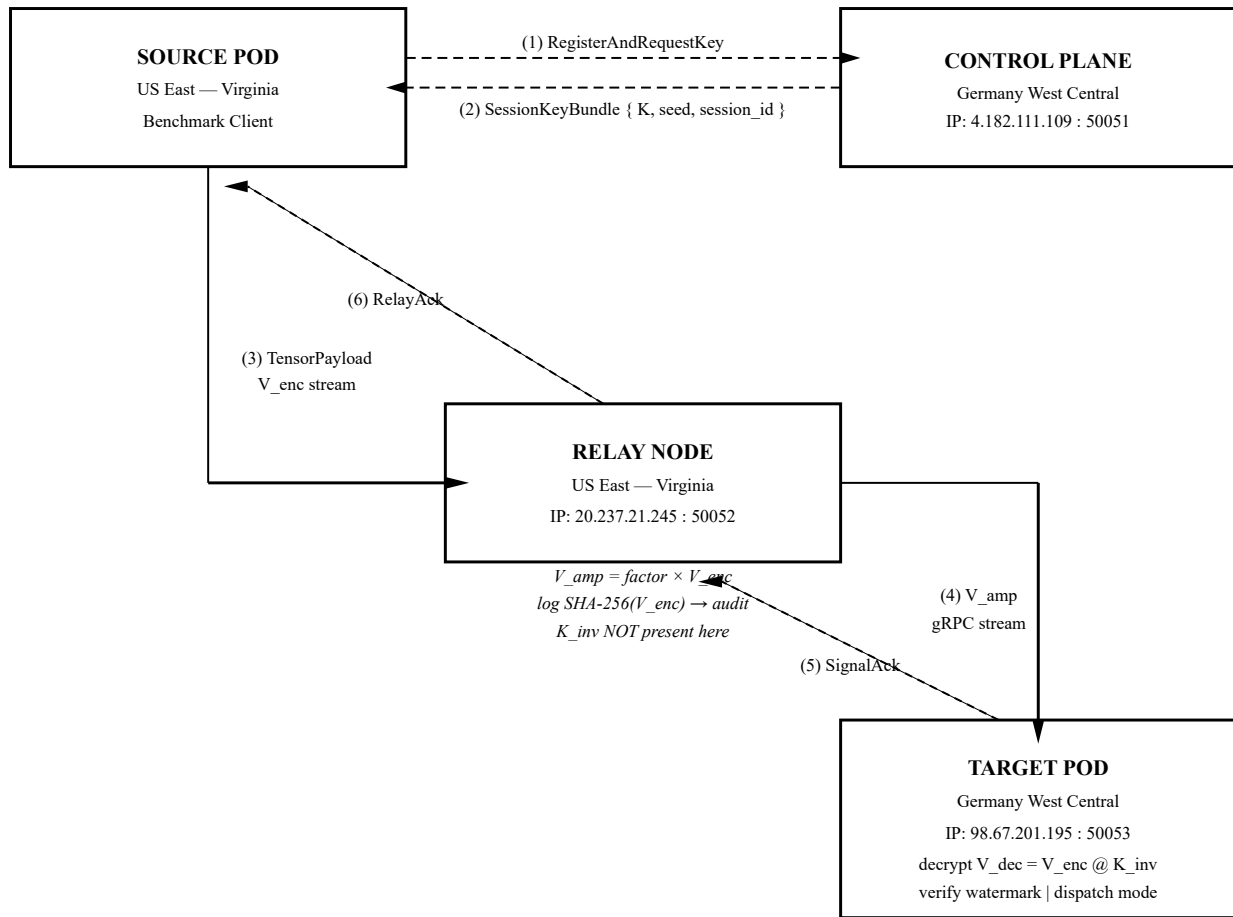

FIG. 1

CHORUS Fabric Four-Node Architecture — Transatlantic Deployment

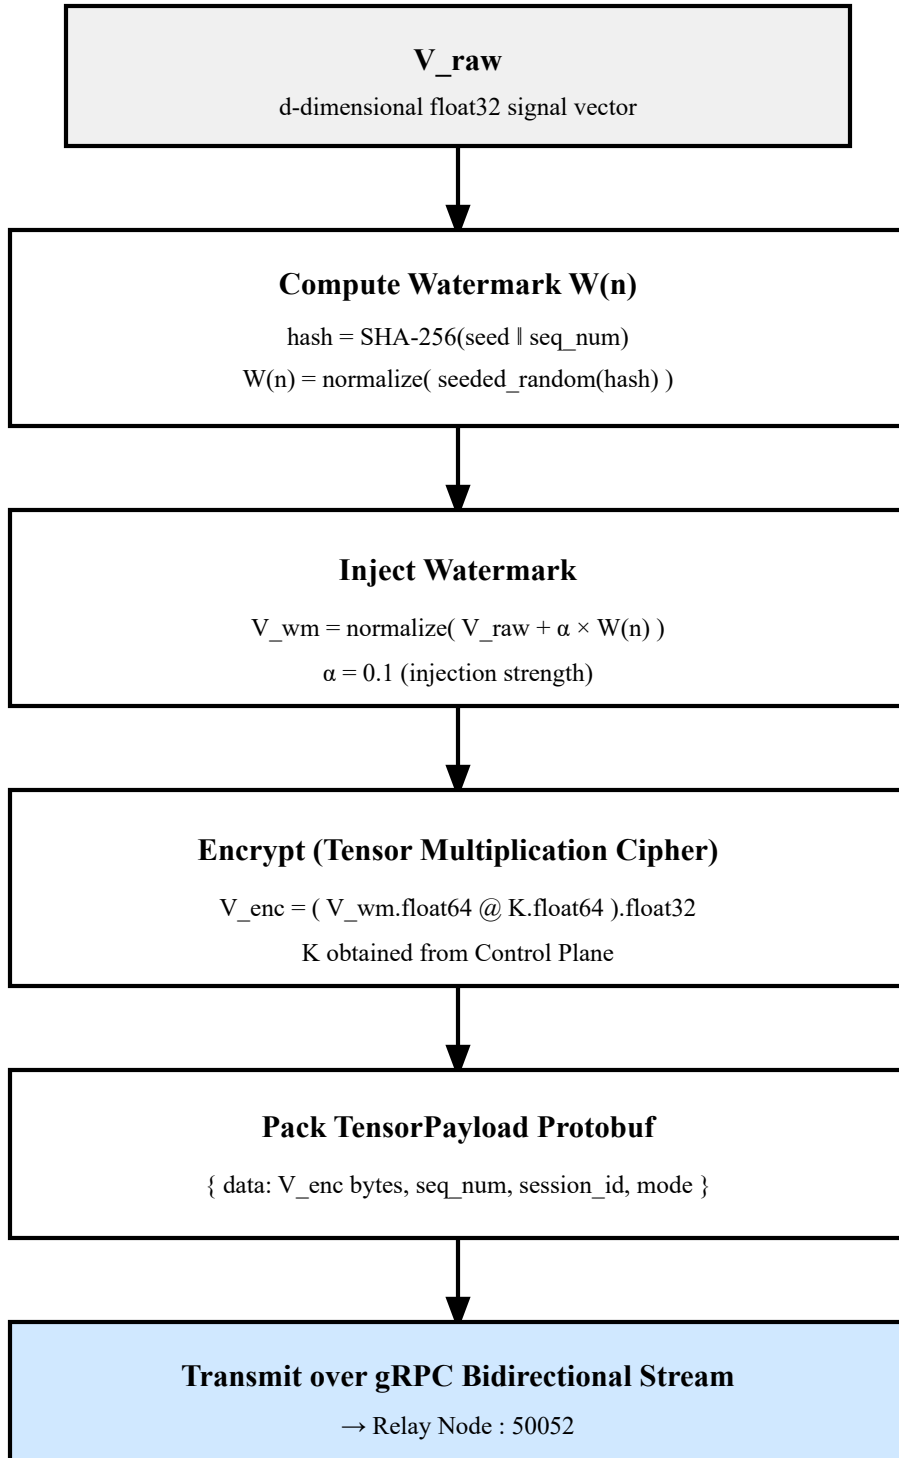

FIG. 2

Watermark Injection and Encryption at Transmitting Node

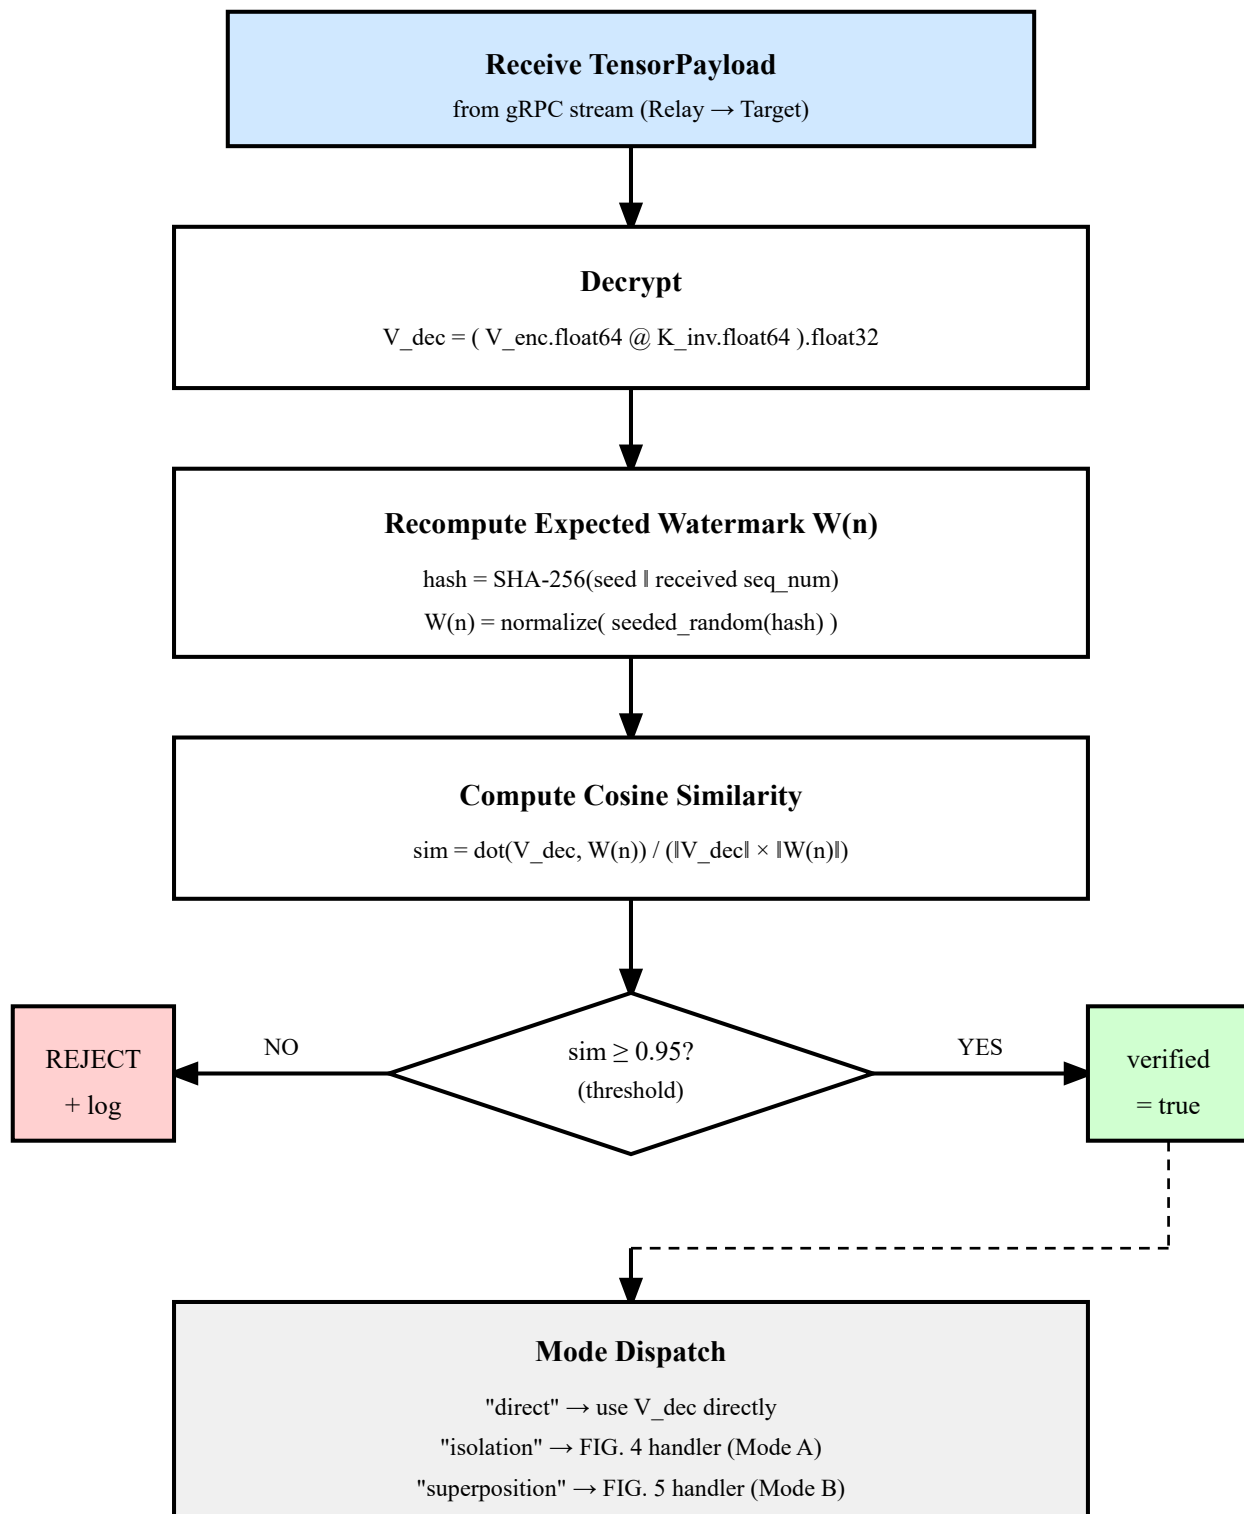

FIG. 3

Decryption, Watermark Verification, and Mode Dispatch at Receiving Node

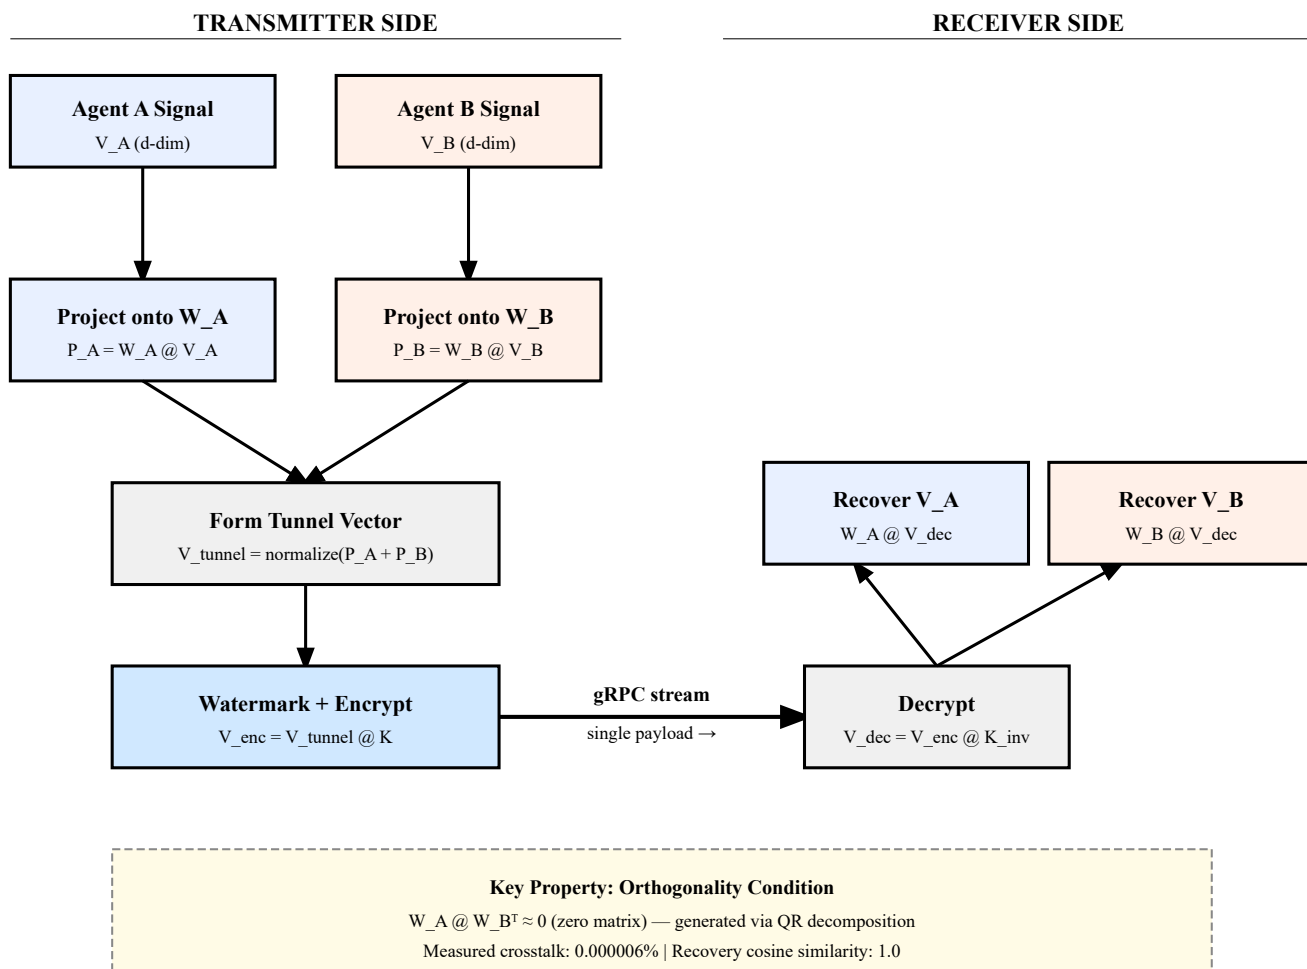

FIG. 4

Mode A Orthogonal Isolation: Dual-Signal Multiplexing over Shared Channel

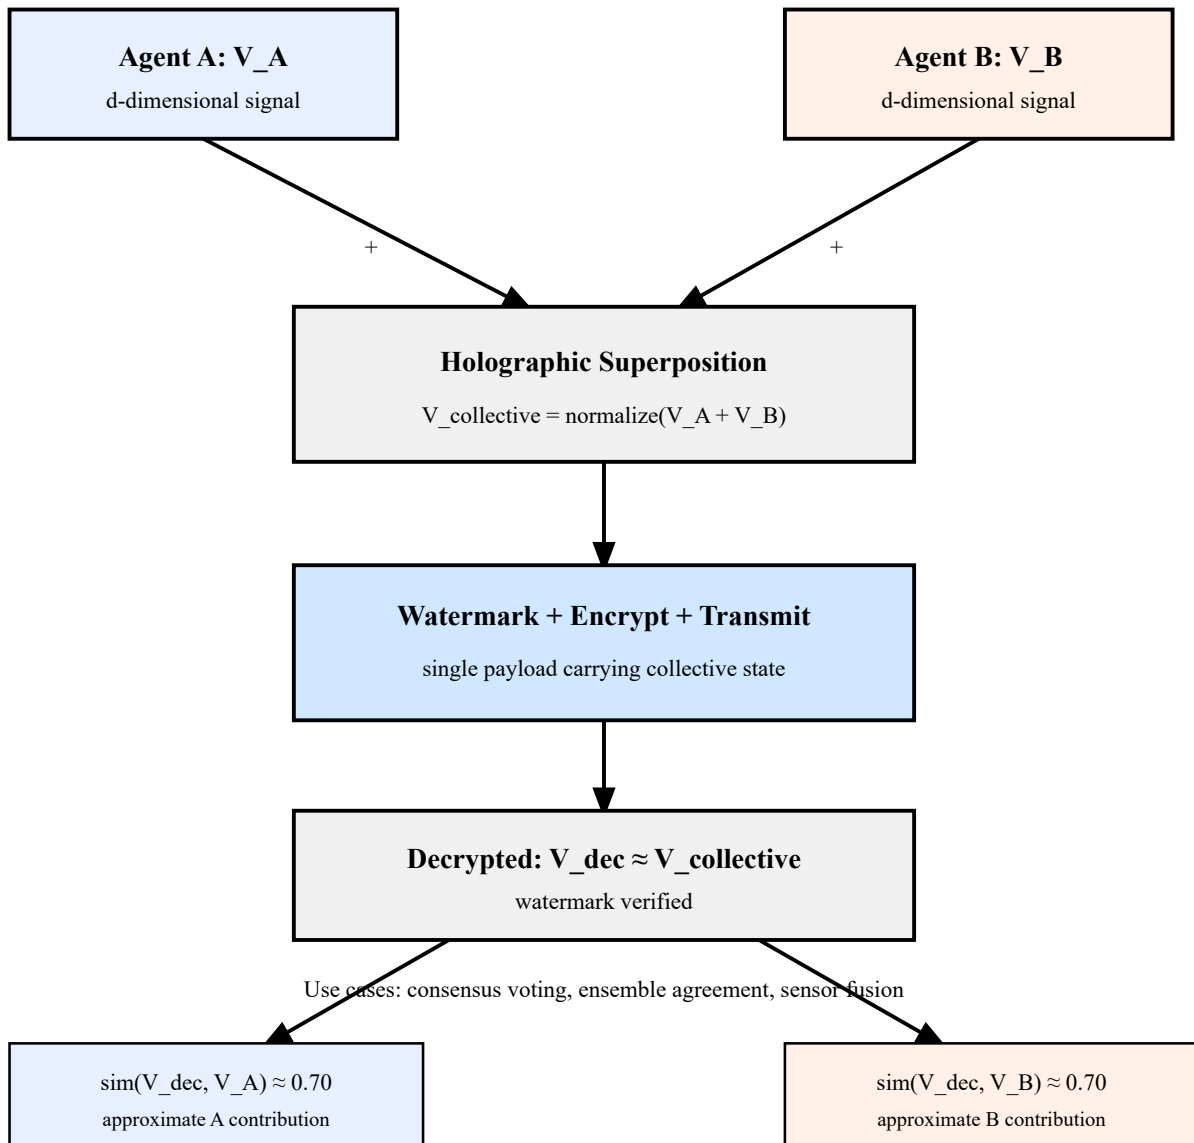

FIG. 5

Mode B Holographic Superposition: Collective State Transmission

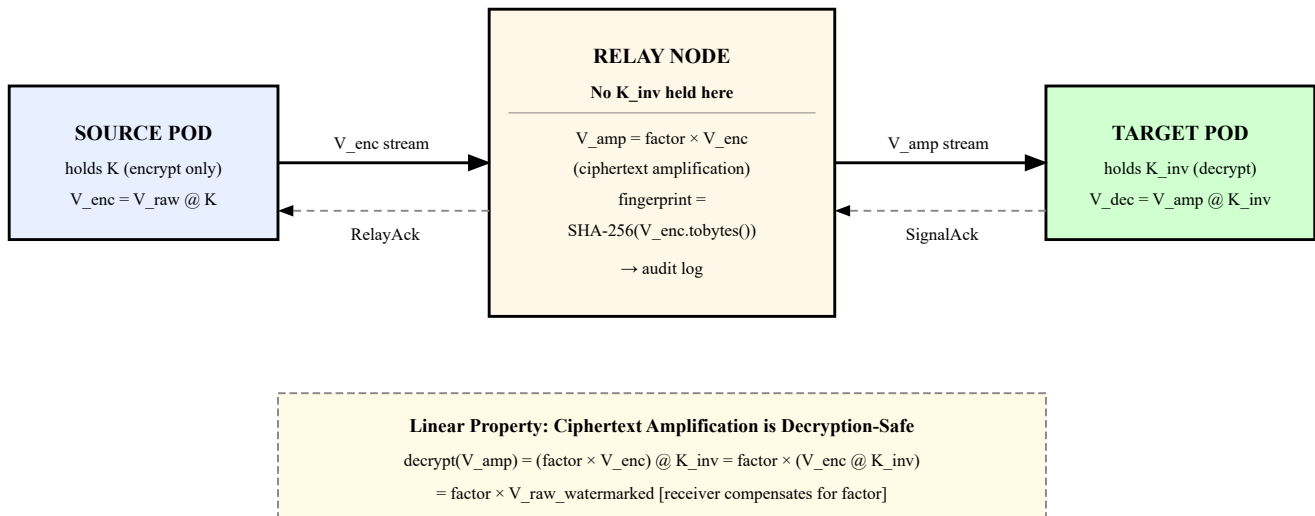

FIG. 6

Relay Node: Ciphertext Amplification Without Decryption Key

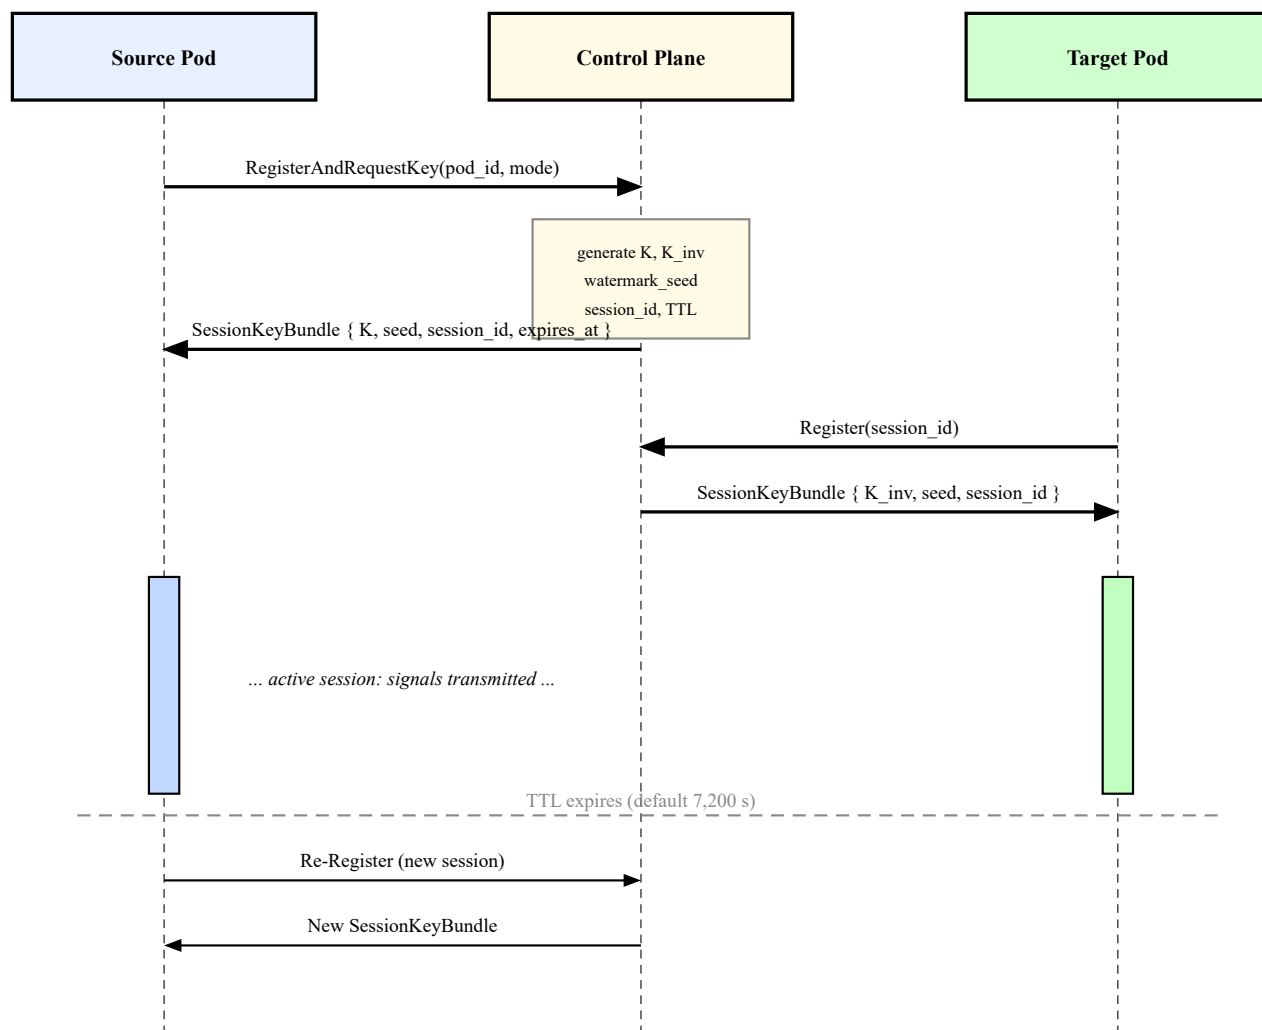

FIG. 7
Control Plane Session Key Issuance and TTL Lifecycle

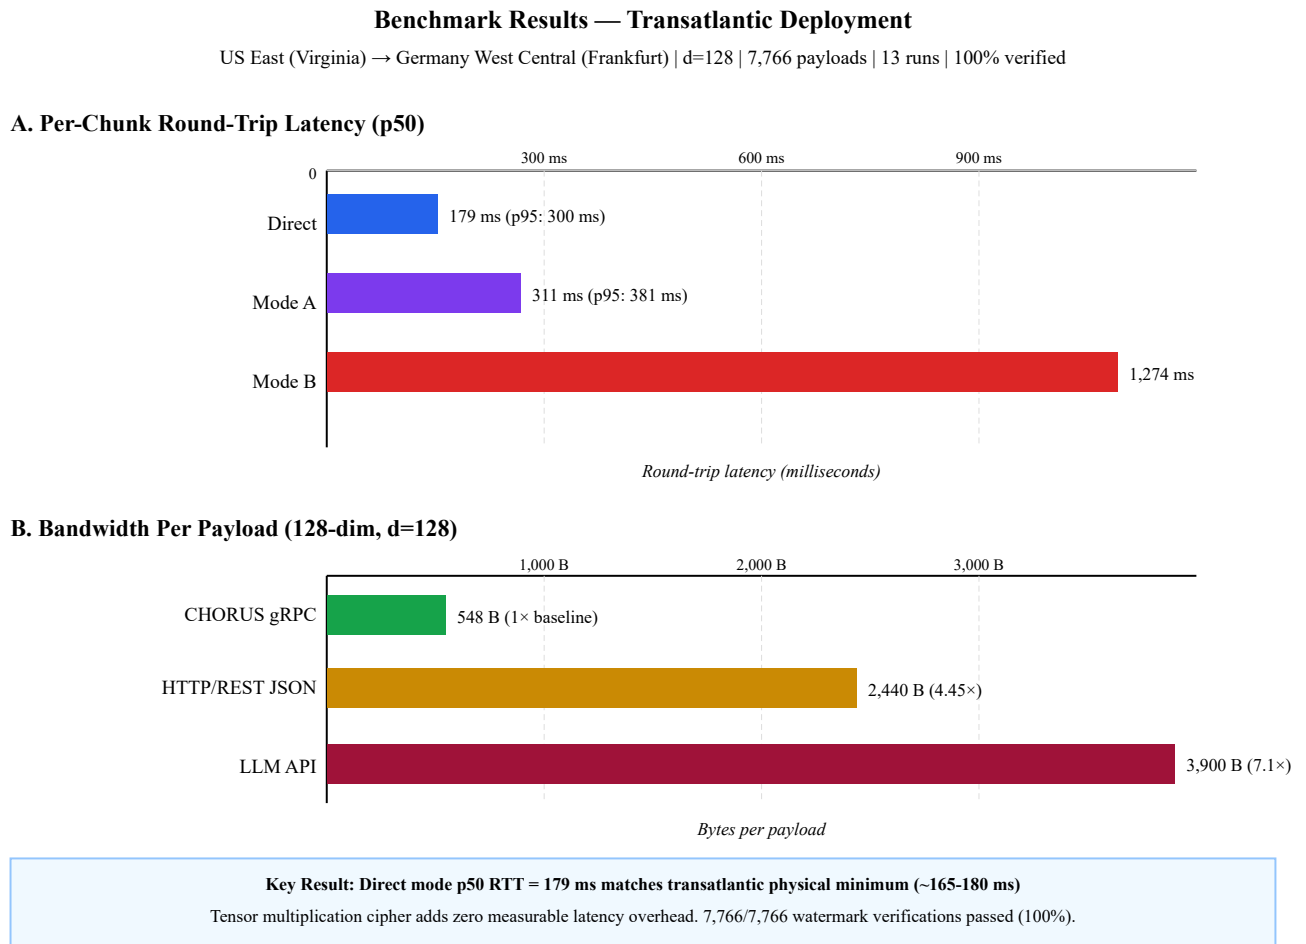

FIG. 8
Benchmark Results: Transatlantic Latency Distribution and Bandwidth vs. Existing Protocols
